GIT - PROJECT

GIT PROJECT ASSIGNMENT

Remote Repository Setup Without GitHub

Name: Harinarayana G

Date: April 2026

GIT - PROJECT

OBJECTIVE

To create a Git remote repository without using GitHub and demonstrate collaboration between two developers using Git commands.

REQUIREMENTS

- 3 Servers (Remote, Dev-Hari, Dev-Kiran)
- Git installed on all servers
- SSH access between servers

GIT - PROJECT

STEP 1: INSTALL GIT

Installed Git on all servers using:
sudo yum install git -y

STEP 2: CREATE REMOTE REPOSITORY

On Remote Server:
cd /home/ec2-user
git init --bare Mycoffee-shop.git

GIT - PROJECT

STEP 3: DEV-HARI WORKFLOW

On Dev-Hari Server:

```
cd /home/ec2-user
mkdir project && cd project
echo "<h1>Krishna Bhagavad Gita</h1>" > index.html
git init
git config --global user.name "Hari"
git config --global user.email "hari@gmail.com"
git add .
git commit -m "first commit"
git branch -M main
git remote add origin ec2-user@172.31.74.171:/home/ec2-user/Mycoffee-shop.git
git push -u origin main
```

GIT - PROJECT

STEP 4: DEV-KIRAN WORKFLOW

On Dev-Kiran Server:

```
cd /home/ec2-user
git clone ec2-user@172.31.74.171:/home/ec2-user/Mycoffee-shop.git
cd Mycoffee-shop
git checkout main
echo "<p>Kiran update</p>" >> index.html
git add .
git commit -m "kiran update"
git push origin main
```

GIT - PROJECT

STEP 5: RESULT

- Remote repository successfully created
- Dev-Hari pushed initial code
- Dev-Kiran cloned and modified code
- Changes successfully pushed back to remote repository

CONCLUSION

Thus, we successfully created a remote Git repository without using GitHub. Dev-Hari pushed the code, and Dev-Kiran cloned, modified, and pushed the updated code successfully.

GIT - PROJECT

git push origin main
[main 2eaad78] kiran update
 Committer: EC2 Default User <ec2-user@ip-172-31-73-83.ec2.internal>
Your name and email address were configured automatically based
on your username and hostname. Please check that they are accurate.
You can suppress this message by setting them explicitly. Run the
following command and follow the instructions in your editor to edit
your configuration file:

    git config --global --edit

After doing this, you may fix the identity used for this commit with:

    git commit --amend --reset-author
